SUMMARY

Product designer working across consumer mobile products and enterprise operations tooling. Designed the UI for a mobile app now past 100,000 users, including a full redesign currently shipping. At a Dubai engineering contractor I designed and built a manpower and procurement system on top of SAP, replacing manual reporting across roughly 15 sites. Founder of Rasoi Pay, a QR-ordering platform taken from concept to live product.

EXPERIENCE

Danway Electrical & Mechanical Engineering | Dubai, UAE

Product Designer · Jun 2025 – Present

- Designed and built a manpower management system as an extension of SAP, covering daily reporting for supplied manpower across approximately 15 project sites.
- Automated the daily manpower report that previously took 40 to 60 minutes to compile by hand each morning against a 9am deadline.
- Reduced the wider daily timekeeping workload from 3 to 4 hours down to 10 to 15 minutes. This module is live and in daily use.
- Traced a procurement bottleneck to per-seat SAP licence cost: storekeepers had no system access, so item lists went by spreadsheet to a head office assistant who searched and keyed in each item one at a time.
- Scraped and restructured the SAP item master so storekeepers search items and raise requisitions themselves, leaving the office assistant to paste codes rather than hunt for them. Extended into requisition tracking and site-level inventory. Currently in build.
- Designed with storekeepers, timekeepers and head office admin as the real users, targeting the specific step in each process that cost the most time.

Rasoi Pay | Remote, India

Founder & Product Lead · Feb 2024 – Present

- Founded and designed a QR-ordering and restaurant management platform, taking it from concept to a live product with five restaurants onboarded.
- Owned the full journey end to end: diner ordering and menu browsing, merchant dashboard, and onboarding.
- Designed both the diner-facing and merchant-facing surfaces as one consistent product, so patterns carried across as scope grew.
- Shipped the front end in Next.js and Firebase, building from my own designs.

Webzspot Technology | Remote, India

UI/UX Designer · May 2023 – Feb 2024

- Designed responsive websites and client portals across multiple concurrent client projects rather than a single account.
- Worked from concept through user flows to final interface, adapting to different client sectors and users, and delivered to WCAG contrast and keyboard-navigation standards.

SELECTED WORK

Iqra — Mobile app, 100,000+ users. Designed the UI, and led a full app redesign now shipping in staged releases.

Rasoi Pay — QR ordering and restaurant management · mdaafjalkhan.in/case-studies/rasoipay

Danway manpower and procurement system — SAP extension, under NDA. Available to walk through in interview.

SKILLS

Design design systems, component libraries, design tokens, wireframing, high-fidelity prototyping, interaction design, responsive and mobile-first, WCAG contrast and keyboard navigation

Research user interviews, usability testing, heuristic analysis

Tools Figma, Framer, Sketch, Photoshop, Next.js, React, Firebase, HTML/CSS

EDUCATION & CERTIFICATIONS

Google UX Design Professional Certificate — Coursera, 2025

Electronics & Systems Engineering (partial) — Govt. Polytechnic Ghaziabad

High School — Radha Krishna Academy, Uttar Pradesh, India

Languages: English (fluent) · Hindi (native)
